

SUYASH GUPTA

Java Full Stack Developer

+91-8817694170 | suyash2000.sg@gmail.com | [linkedin.com/in/suyash2000](https://www.linkedin.com/in/suyash2000) | github.com/suyash2000

PROFILE SUMMARY

Java Full Stack Developer with 4+ years of experience building enterprise-grade applications using Java, Spring Boot, and React. Hands-on experience integrating LLM APIs (OpenAI, Claude) into production Spring Boot microservices and implementing AI-assisted workflows — directly aligned with AgentAI-ready development practices. Delivered measurable impact across fintech, mobility, and gov-tech. Experienced in RAG-based feature design, AI copilot-assisted development, and full-stack delivery with React frontend and Spring Boot backend in Agile teams.

TECHNICAL SKILLS

Backend: Java (8–21), Spring Boot 3.x, Spring Security, Microservices, REST APIs, Kafka

Frontend: React.js, TypeScript, HTML5, CSS3

Databases: PostgreSQL, MySQL, MongoDB, Elasticsearch, Cassandra, Redis

DevOps: Docker, Kubernetes, Jenkins, Git, CI/CD, Prometheus, Grafana

Agentic AI: LLM API Integration (OpenAI, Claude), Agentic Workflows, AI-powered Backend Services

PROFESSIONAL EXPERIENCE

Software Engineer · Infosys Limited

Mar 2025 – Present

- Modernised core banking APIs at Westpac and integrated LLM APIs into backend services, improving runtime performance, reducing deployment failures, and enabling AI-assisted workflows.
- Collaborating in Agile sprints for production-grade microservices delivery across Business Lending APIs.

Software Engineer · Tarento Technologies Pvt. Ltd.

Aug 2022 – Feb 2025

- Delivered full stack features (Java + React) for NSDC Skill India Digital Hub and Ola Electric across high-traffic production environments.
- Designed search APIs, data pipelines, and cloud migration solutions serving millions of users across government and mobility platforms.

KEY PROJECTS

Westpac Banking

Mar 2025 – Present

- Designed Vulnerability Resolution Agent reducing security patch time by 99.7% and saving \$1.18M annually.
- Integrated LLM APIs (OpenAI / Claude) into existing Spring Boot banking services, enabling AI-assisted workflows and reducing manual decision-making overhead.
- Used AI coding assistants (GitHub Copilot) to accelerate development velocity — reducing boilerplate code time by ~30% and improving documentation coverage across the API layer.
- Modernised 5+ Business Lending APIs to Java 17/21 and Spring Boot 3.x, boosting runtime performance, cutting memory overhead, and unlocking support for modern libraries.
- Resolved high-priority compliance issues, strengthening code quality and achieving zero critical defects in post-deployment.

Ola Electric

Aug 2024 – Feb 2025

- Chose Kafka over synchronous REST for vehicle event streaming to decouple services, ensure zero message loss, and handle 1M+ concurrent device events during cloud migration.
- Streamlined vehicle registration workflows, cutting manual intervention by 60% and reducing latency by 40%.
- Upgraded backend services from JDK 8 → 17, improving runtime performance by 25–30%.

NSDC – Skill India Digital Hub

Jun 2023 – Jul 2024

- Selected Elasticsearch over PostgreSQL after benchmarking — achieved sub-100ms response on 1M+ records vs 800ms+ with SQL, cutting infrastructure downtime by 70%.
- Opted for Redis distributed sessions over DB-backed storage to eliminate single points of failure, handling peak-traffic spikes and lowering server load by 35%.
- Architected a scalable registration platform, tripling throughput with 45% improvement in data accuracy.

Smart Document Q&A – Personal Project

In Progress

- Building a Spring Boot + OpenAI API service that accepts documents, answers natural language queries with context-aware responses — includes chunking, response validation, and secure key management.
- Demonstrating end-to-end Agentic AI integration on a production-grade Java backend.
- Designed retry logic and graceful fallback for LLM response failures, with structured JSON output enforcement per request.

EDUCATION

B.E. in Computer Science & Engineering

2018 – 2022 | CGPA: 8.0

M.V. Jayaram College of Engineering, Visvesvaraya Technological University

HONORS & AWARDS

- Insta Award (Nov 2025 & Feb 2026):** Recognised by Infosys for strong dedication, ownership, and consistently delivering high-quality output.
- Spot Award (Q3 2024):** High-efficiency toolkit streamlining user registration on the PMV platform at Tarento.
- Recognition Award (Q4 2023):** Led SIDH registration flow — achieved 1M+ user sign-ups within a month.
- Team Impact Award (Q2 2023):** Delivered high-performance Elasticsearch Search API significantly boosting portal functionality.
